

BYOx 2025

Device Specifications

In 2025, all Year 10, 11 & 12 students will be required to participate in the BYOx program. This program requires students to bring a digital device such as a laptop or tablet to school to support their learning.

Mobile phones and android devices are not appropriate.

Students using their own device will be:

- Operating in a digital classroom – Accessing lesson material, assessment and a dedicated student working space that can be used to collate notes, conduct research and online learning.
- Using software and processes that are consistent with industry practice, preparing our learners for career development and the workforce.
- Able to receive feedback on learning and assessment from teachers.

Software Access - Office 365 (Word, PPT, Excel, OneNote)

All Bundamba SSC Students can download the full Microsoft Office 365 Suite for FREE. See the school website for details.

For further information, go to the school website.
