

The Triad Observations will take place with mutually agreed peers once per semester. The observations themselves will be based around the school focus at that time but teachers can decide on their own focus too. Each teacher will be observed by two peers once per semester and they will also observe two peers once per semester. This will take place on one day (where possible) and staff will teach and observe in periods 1, 2 and 3 and feedback/reflection will take place period 4. Prior to the lesson observation, it is suggested but not mandatory that staff provide each other with the unit plan they are covering at that time and a copy of the BSSC lesson plan to enable staff to understand the context of the lesson more. Staff should arrange a focus for their lesson prior to the lesson being observed. Following the lesson, the teacher and observers meet and the observers provide feedback of the lesson around the topic/area that has been agreed upon.

## Triads at BSSC

### Pre observation
